NOTICE TO SUBSCRIBERS

As printed, there are two places in this October 1970 issue of The National Union Catalog in which pages are reversed. The out-of-order pages are 377-378 and 392-393. In both cases, the two pages should be in the reverse order from that found in the printed issue. Please note the incorrect sequence on the pertinent pages.

We must apologize for this printing error and ask your help in making the needed notations in your copies.

Because of our close production schedules, it is not possible to have this issue reprinted. We are taking added precautions to prevent this type of error and we do hope to avoid this type of error in future issues.

Also, page 278, while in its correct alphabetical sequence in the issue, incorrectly has the page number 478.

Your considered cooperation and kind patience in this matter is greatly appreciated.

PREFACE

This ninth revised edition of Symbols Used in the National Union Catalog of the Library of Congress includes approximately 800 new symbols that did not appear in the eighth edition and some 100 symbols that have been revised to reflect changes in names or in locations of libraries. This list records all of the symbols that are currently used in the National Union Catalog, A Cumulative Author List, in New Serial Titles, in Newspapers on Microfilm, and in the Union List of Serials, second edition, 1943, and the third edition, 1965.

In the prefaces to previous editions of this list, attention was called to the fact that in some instances the National Union Catalog symbols varied from those used in the Union List of Serials and that no attempt was made to reconcile these differences on the assumption that little or no confusion would result so long as there was no intention of integrating the entries in the Union List of Serials with those in the National Union Catalog. Now, however, because the National Union Catalog symbols are being used in New Serial Titles and will be used to identify new libraries that have contributed entries to the Third Edition of the Union List of Serials, it has become necessary to reconcile the two lists of symbols whenever possible and to correlate those that are in conflict. Accordingly, this list includes all of the symbols that were used in the Union List of Serials and its supplements. Whenever feasible, the Union List of Serials symbols have been adopted as the National Union Catalog symbol; otherwise, cross references are provided.

The Canadian library symbols represent the basic symbols that have been established by the National Library of Canada. The prefix "Ca" has been added to each symbol to avoid confusion when these symbols are used in the United States. A complete list of obsolete Canadian library symbols follows the current list of Canadian symbols.

Acceptance by compilers of bibliographies and checklists of the National Union Catalog system of symbols as the standard for library designations has increased notably in recent years. In order to promote this trend toward uniformity, this list includes symbols for many libraries and institutions which have not as yet contributed cards to the National Union Catalog.

This list appears in two arrangements, the first, alphabetically by the symbol for the library, the second, alphabetically by the name of the library. In the second arrangement generally only the main library of an institution is listed.

Copy for the lists of symbols was prepared on IBM cards on an IBM Electric Executive Typewriter, Bold Face No. 2 type, and was photographed on a Recordak Listomatic Camera. The camera recorded the data on a continuous roll of film, which, after being processed, was cut into page layouts from which offset printing plates were made.
